

QYM-Airport Fence

QYM-Airport Fence, by definition is mainly used in the airport as a protective fence. The net body is welded with 4.0/5.0 mm low carbon steel wire, the surface will be electrostatic polyester powder coated or PVC coated after electro-galvanized. 60 mm Y shaped square pipe will be put at 2.5m intervals for the connection of the mesh. Concertina wire will be put at the top of the fence to make the fence more securer.

Mesh:50X100mm

Mesh:55X100mm

For panel

Panel	Mesh	Wire Thickness	Surface Treatment	Panel Width	Folds NOS.	Panel Height	Fence Height
Big Panel	50x100mm 55x100mm	4.00mm 4.50mm 5.00mm	Galvanized and Electrostatic polyester powder coated or PVC coated	2.50m 3.00m	4	2000mm	2700mm
					5	2300mm	3200mm
					6	2600mm	3700mm
V panel					2	530mm	2700mm
						630mm	3200mm
						730mm	3700mm

Y Post-(SHS)

Profile	Wall Thickness	Surface Treatment	Length	Base Plate	Rain hat
60x60mm	2.0mm 2.5mm	Galvanized and Electrostatic polyester powder coated	2700mm + 550mmV	Available on request	Plastic or Metal
			3100mm + 650mmV		
			3600mm + 750mmV		

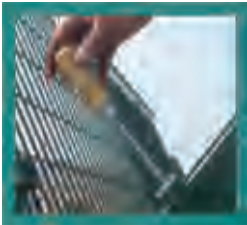

10 YEAR WARRANTY

QYM-Airport Fence

Fittings and tools

Mainly include clips for connecting the big panel and Y post; Clips for connecting the V panel and Y post; Clips for connecting V panel and big panel.

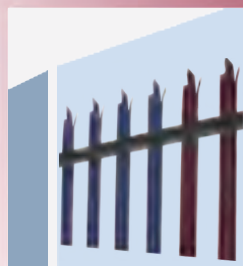

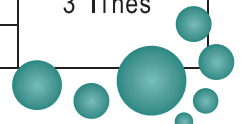

Support post

This kind of post will be put at 25m or 30m intervals.

Profile	Wall Thickness	Surface Treatment	Length	Base Plate	Rain hat
60x60mm	2.0mm 2.5mm	Galvanized and Electrostatic polyester powder coated	1900mm/ + 400mm I	Available on request	Plastic or Metal
			2200mm/ + 500mm I		
			2500mm/ + 500mm I		

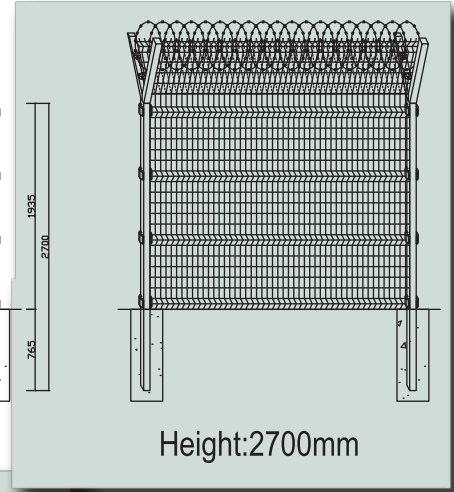

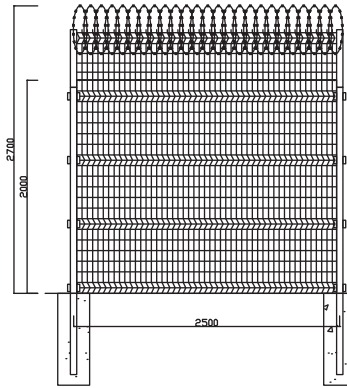

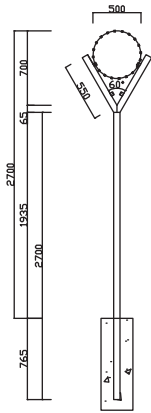

Top concertina razor wire

Type	Core wire / Blade thickness	Surface Treatment	Length	Outside diameter	Clips
BTO-22	2.5 / 0.5mm	Hot dipped galvanized	8-10m/ roll	500mm	3 lines
